

STS & STT Thin

ELECTRIC INFRARED COMFORT HEATERS

- 100% electric IR flat panel emitter, operates in long wave length.
- Listed for mounted or suspended indoor and outdoor protected environments. Ideal for comfort heating and snow/ice control.
- Single and Three Phase designs. All standard US voltages available.
- All models available in Stainless Steel or high temp powder coated black or white.
- ZERO MAINTENANCE: no moving parts, , no fans, and no dangerous bulbs to clean or replace.
- No orange glow: this heater does not emit any visible light.
- 95% energy efficient
- MADE IN THE USA

STS METHODS OF INSTALLATION:

Do not install the heater closer than:

INDOOR

- 4 inches to a horizontal surface
- 12 inches to a vertical surface
- 36 inches to another heater
- 6 feet from the floor

Fig. 1 – WALL MOUNTING

Fig. 3 – CEILING MOUNTING ANGLED AWAY FROM VERTICAL SURFACE

Fig. 4 – CEILING MOUNTING ANGLED TOWARDS VERTICAL SURFACE

Fig. 2 – CEILING MOUNTING VERTICAL

PROTECTED AREA

A *Protected Area* is defined as “Located in an area that is partially protected from the effects of weathering.” Typical *protected areas* would be the underside of a pavilion with a roof, garage port, and the like.

Adhere to all mounting guidelines above. Additionally: no less than 18" from ledge.

STS

Infrared Heater Specifications

The electric infrared heater shall be STS as manufactured by Indeeco, St. Louis, MO. The construction and design shall permit it to be ceiling or wall mounted, with the use of the mounting brackets supplied, or chain hung according to supplied instructions. Heaters shall include the features listed below.

HEATING ASSEMBLY: The heating assembly shall be UL listed under standard 2021 and shall consist of single stranded, non-coiled Ni-Chrome wire embedded in vitrified ceramic fiber and backed with high density, low biopersistent Fiberfrax insulation. The emitting surface is covered with a black-coated high temperature fiberglass cloth.

WIRING: For connection to the power supply, STS heaters will be prewired with leads housed in a 24 inch flexible metal conduit and connector for j-box mounting.

CONSTRUCTION: The heaters are formed and welded together out of 16 ga. and 20 ga. CRS or stainless steel. If CRS, the heater must be powder coated with a high temp black or white finish.

For supply connections use the wire size (or larger) as directed by the chart below.
All wires must be suitable for at least 75°C (167°F).

STT THIN METHODS OF INSTALLATION:

Do not install the section closer than:

INDOOR

- 36 inches to a vertical surface for vertical mounting
- 6-7/8 inches to a vertical surface for angled ceiling mounting
- 6-7/8 inches to a horizontal surface for wall mounting
- 12 inches to an adjacent vertical surface
- 36 inches to another heater
- 6 feet from the floor

Fig. 1 – ANGLED POSITIONING FOR WALL MOUNTING

WARNING! Risk of fire. Do not position any heater at an angle not allowed by the slotted hole (20°-45°).

STT Thin Infrared Heater Specifications

The electric infrared heater shall be STT Thin as manufactured by Brasch, St. Louis, MO. The construction and design shall permit it to be ceiling or wall mounted, with the use of the mounting brackets supplied, or chain hung according to supplied instructions. Heaters shall include the features listed below.

HEATING ASSEMBLY: The heating assembly shall be cULus listed under standard 2021 and shall consist of single stranded, non-coiled Ni-Chrome wire embedded in vitrified ceramic fiber and backed with high density, low biopersistent Fiberfrax insulation. The emitting surface is covered with a black-coated high temperature fiberglass cloth.

WIRING: For connection to the power supply, STT heaters will include an indoor outdoor rate j-box mounted to the heaters raceway.

CONSTRUCTION: The heaters are formed and welded together out of 16 ga. and 20 ga. CRS or stainless steel. If CRS, the heater must be powder coated with a high temp black or white finish.

For supply connections use the wire size (or larger) as directed by the chart below. All wires must be suitable for at least 90°C (194°F).
