## 916B Series

## ARCHITECT'S AND ENGINEER'S SPECIFICATIONS*

Furnish and install, where indicated on plans, 916B Series convector type heaters, suitable for continuous operation, as manufactured by Brasch.

ENCLOSURE: Shall be a minimum 10 gauge ( 0.95 " min.) aluminum extrusion. The one-piece back and bottom shall join to the one-piece top and front utilizing Brasch's Snap-Lock design. Both inlet and outlet air grilles shall be punched pencil-proof slots negating the need for mesh
under the grille.
SIZE: Heaters shall be low profile ( $53 / 8^{\prime \prime} \times 7$ ") and available in standard lengths from 28 inches through 12 feet. Additionally, custom length cabinets available with single or multiple heat decks shall be furnished as specified.
HEATING LENGTHS AND VOLTAGES: Heater lengths, voltages and wattage capacities shall be as indicated on the plans.
FINISH: The top and front shall be finished with a baked enamel paint or anodized. Finished backs are available upon request.
HEATING ELEMENTS: The nickel-chromium heating element wire shall be encased in a steel sheath for maximum, trouble-
free element life. Aluminum fins shall be pressure bonded to the steel sheath. Elements shall be centered, anchored and shall float freely at each end through high-temperature Noryl bushings.

CONTROL SECTIONS: Control sections, finished to match heaters, shall be furnished as an optional accessory for field installation of controls, or shall be used to house factory-installed controls as specified.
OPTION BUILT-IN CONTROLS: Thermostats, power relay, lowvoltage control relays, and power on/off switches, singly or in combination, may be specified for factory installation in heaters. Thermostats and power on/off switches are accessible through the grille.

PEDESTALS: The heater shall be convertible for use as a selfstanding unit with pedestal conversion kit. Pedestals shall be painted steel or anodized aluminum. Pedestals can either be mounted on or embedded in the floor surface, and wiring or conduit brought through the pedestal during installation.
